

Microsoft DP-100 Exam Questions - Proven Strategy to Get Success

The registration cost for certain professionals like ***Azure Data Scientist Associate DP-100 exam questions*** is costly. Therefore, it is the desire of every Microsoft DP-100 certification exam candidate to pass on the first attempt. However, Designing and Implementing a Data Science Solution on Azure DP-100 exam dumps success doesn't happen overnight. It does not come from the verbal confession of success. To be successful, you must pay the price. The price of examination success lies not only inadequate preparation. It also has a lot to do with studying with the best ***Microsoft DP-100 Questions***. One of the best platforms for the preparation of Azure Data Scientist Associate DP-100 exam dumps is with CertsFire products. CertsFire has a great reputation for delivering the best Microsoft DP-100 exam questions. Designing and Implementing a Data Science Solution on Azure DP-100 exam dumps candidates who have used their exam materials all passed their exam. This is so for many reasons.

The Best Features of Microsoft DP-100 Exam Questions:

CertsFire designed their ***Microsoft Exam Questions*** into three formats. The formats are web-based practice software, desktop practice software, and PDF. You can choose any of these formats to study and prepare for the Microsoft DP-100 exam dumps. It gives you the option of choosing the best format to study. When you study in your preferred format, your chances of success increase. The Azure Data Scientist Associate DP-100 practice questions support time customization and the creation of mocks. With the Microsoft DP-100 PDF dumps, you can print out the material and study handy with it. The ***Designing and Implementing a Data Science Solution on Azure DP-100 exam questions*** formats are portable, so you can easily read the Microsoft DP-100 exam dumps material anytime and anywhere.

- **Customization Options:**

Microsoft DP-100 exam questions, just like other professionals, is time competitive. There is a tendency to know the answers to questions but yet fail because of time. To help ***Azure Data Scientist Associate DP-100 exam dumps*** candidates can prepare themselves in a better way. You can customize the time duration as you practice. This will help you know if you are fast or not and to make necessary adjustments. The more you attempt the Designing and Implementing a Data Science Solution on Azure DP-100 exam, the more your time management skill will improve.

- **Practical Experience:**

The CertsFire Microsoft DP-100 exam questions significantly improve your problem-solving and time management skills. As you practice this Azure Data Scientist Associate DP-100 exam on web-based and desktop software, you can have an experience of what writing an **actual Designing and Implementing a Data Science Solution on Azure DP-100 exam questions** are. It will increase problem-solving skills and enable you to complete the Microsoft DP-100 exam dumps within the time limit.

- **Meets Microsoft's Standard:**

It is one thing to study with Microsoft DP-100 exam questions and another thing to study with one that meets certain standards. **CertsFire Azure Data Scientist Associate DP-100 exam dumps** meet Microsoft's standards. It gives you an edge over others who study with any Microsoft DP-100 exam material.

- **Compatibility:**

You can use the CertsFire Microsoft DP-100 exam dumps materials immediately after purchase. There is no need to spend again buying and installing new software or programs. The **Designing and Implementing a Data Science Solution on Azure DP-100 exam questions** material runs seamlessly on major operating systems like Windows, Mac, Linux, Android, etc. It is also compatible with Firefox, Internet Explorer, Google Chrome, Opera, and other major web browsers.

Get Microsoft DP-100 Exam Questions and Improve Your Preparation:

Unlike other exam product companies, **CertsFire** doesn't compromise on the content quality of its products. CertsFire thoroughly prepared their Microsoft DP-100 exam dumps material with expert guidance. Our **Azure Data Scientist Associate DP-100 exam questions** were launched in the market after the feedback of more than 90,000 professionals worldwide. The experts have years of experience in the field, and they added each question carefully. Therefore, they can easily predict the possible questions you would see in the main Microsoft DP-100 exam.

Have you ever wondered why there are a high number of exam candidates using this Azure Data Scientist Associate DP-100 dumps material? Why do candidates prefer using CertsFire Microsoft DP-100 exam questions for the preparation of Designing and Implementing a Data Science Solution on Azure? The answer is simple. Our Azure Data Scientist Associate DP-100 dumps are similar to the real Microsoft DP-100 exam. The **Designing and Implementing a Data Science Solution on Azure DP-100 questions** in the exam materials are similar to the questions you will see on the actual Microsoft DP-100 exam. As earlier mentioned, feedback from more than 90,000 professionals was collected to prepare it. Therefore, it is a reliable and accurate solution for the preparation of Azure Data Scientist Associate DP-100 exam questions.

Question No. 1

You use Azure Machine Learning to train a model based on a dataset named dataset1.

You define a dataset monitor and create a dataset named dataset2 that contains new data.

You need to compare dataset1 and dataset2 by using the Azure Machine Learning SDK for Python.

Which method of the DataDriftDetector class should you use?

- A. run
- B. get
- C. backfill
- D. update

Answer: C

Question No. 2

You use an Azure Machine Learning workspace.

You have a trained model that must be deployed as a web service. Users must authenticate by using Azure Active Directory.

What should you do?

- A. Deploy the model to Azure Kubernetes Service (AKS). During deployment, set the token_auth_enabled parameter of the target configuration object to true
- B. Deploy the model to Azure Container Instances. During deployment, set the auch_enabled parameter of the target configuration object to true
- C. Deploy the model to Azure Container Instances. During deployment, set the coken_auch_enabled parameter of the target configuration object to true
- D. Deploy the model to Azure Kubernetes Service (AKS). During deployment, set the auch.enabled parameter of the target configuration object to true

Answer: A

Question No. 3

You have a Jupyter Notebook that contains Python code that is used to train a model.

You must create a Python script for the production deployment. The solution must minimize code maintenance.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Refactor the Jupyter Notebook code into functions
- B. Save each function to a separate Python file
- C. Define a main() function in the Python script
- D. Remove all comments and functions from the Python script

Answer: A, C

Question No. 4

You create an Azure Machine Learning workspace named ML-workspace. You also create an Azure Databricks workspace named DB-workspace. DB-workspace contains a cluster named DB-cluster.

You must use DB-cluster to run experiments from notebooks that you import into DB-workspace.

You need to use ML-workspace to track MLflow metrics and artifacts generated by experiments running on DB-cluster. The solution must minimize the need for custom code.

What should you do?

- **A.** From DB-cluster, configure the Advanced Logging option.
- **B.** From DB-workspace, configure the Link Azure ML workspace option.
- **C.** From ML-workspace, create an attached compute.
- **D.** From ML-workspace, create a compute cluster.

Answer: B

Question No. 5

You are planning to register a trained model in an Azure Machine Learning workspace.

You must store additional metadata about the model in a key-value format. You must be able to add new metadata and modify or delete metadata after creation.

You need to register the model.

Which parameter should you use?

- **A.** description
- **B.** model_framework
- **C.** tags
- **D.** properties

Answer: D
